POJA SHRI J M

B.Tech, Artificial Intelligence & Data Science • Jerusalem College of Engineering, Chennai

+91 8682845032 | pojashrijm2006@gmail.com | LinkedIn | Github | Portfolio

PROFILE

Final-year Artificial Intelligence and Data Science student with hands-on experience in data science and NLP. Skilled in Python and SQL, with experience in data preprocessing, feature extraction, classification, and model evaluation. Strong analytical and problem-solving abilities with practical experience building data-driven AI applications.

EDUCATION

B.Tech, Artificial Intelligence and Data Science — Jerusalem College of Engineering, Chennai 2023–2027

CGPA: 9.2 (upto 6th semester)

SKILLS

Programming Languages: Python, Java

Database: SQL, MySQL

Data Science: Pandas, NumPy, Matplotlib, Seaborn

AI/ML: Machine Learning, NLP, OpenCV, RAG, Model Context Protocol (MCP)

Web Development & Deployment: Flask, Streamlit

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

EXPERIENCE

AI & Data Science Intern — Zeptoware Systems Pvt Ltd Dec 2025 – Jan 2026

- Built a fake job posting detection system using NLP, including text preprocessing, feature extraction, and classification models.
- Worked through several rounds of model tuning to bring down false classifications.

IT Intern — Airports Authority of India (AAI) July 2026 (15 days)

- Learned the working of the Airport Operations Control Center (AOCC) and its role in coordinating airport operations.
- Observed management and maintenance of servers, UPS systems, and data center infrastructure to ensure high availability and reliability.

PROJECTS

Fake Job Detection System — NLP & Machine Learning

- Compared Logistic Regression, Random Forest, CNN, and LSTM models using accuracy, precision, recall, and F1-score.
- Deployed the final model as a live web application on Render for real-time job-posting authenticity checks.

DocMind AI — Document Intelligence Platform

- Built a full-stack application using Next.js, React, TypeScript, Groq APIs, and a vector database for semantic search over PDFs.
- Implemented PDF chat, AI summarization, flashcard/quiz generation, and deployed the application end-to-end on Vercel.

Assistive Navigation System for the Visually Impaired

- Designing a computer-vision system for real-time obstacle detection and voice-guided navigation, aimed at lightweight, on-device models.
- Planning audio feedback for detected obstacles and directions to support hands-free real-time guidance.

ACHIEVEMENTS & LEADERSHIP

- **GSSoC 2026** (AI Agents track): ranked in the top 2% of 43,000+ open-source participants.
- **Executive Member**, Association of Artificial Intelligence and Data Science, 2024–2025.
- **Academic rank:** 1st place in department academic performance (Semesters 3 & 4); 2nd place (Semester 2).

CERTIFICATIONS

- Machine Learning — NPTEL (Elite)
- PyTorch Bootcamp — OpenCV University (100%)
- Convolutional Neural Networks with TensorFlow — Coursera
- Natural Language Processing — NPTEL
- IBM AI Fundamentals
